**MedScribe**

**MEDICAL CODING**

### Clinically Trained and Certified Coders

Every coder has a four-year bachelor's degree in nursing and all maintain several industry-standard certifications. We go the extra step to assure that all work being done on your behalf is accurate and clinically relevant.

### Ongoing Education per Changing Industry Regulations

Quarterly educational sessions are conducted in order to assure that our coders are constantly up to date with the latest requirements, regulations, and standards.

### Customer Friendly Per-Record Fee Schedule

In order to encourage the highest level of accuracy from our coders, our coders are incentivized by quality metrics instead of volume coded as opposed to other vendors who focus on producing a certain number of charts per hour.

## Med-Scribe can Perform the Following Coding/Billing Functions:

- **ED:** Facility & ED Profee: E/M Leveling, Physician Billing
- **IP:** Acute Medical and Surgical across all Clinical Specialties (facility coding as well as physician billing), Sub Acute, Specialty Rehab, and Psych
- **OP:** Ambulatory Surgery across all Product Lines, Cardiac Caths/Stents, Infusions, Blood Transfusions, Clinics (facility and physician coding/billing)
- **Radiology:** Diagnostic/ Therapeutic Modalities
- **IR:** Angiography/Phlebography, Interventions
- **Forensic Coding:** Bill Audits, NCCI Edit Resolution and Clinical Appeals

# Med-Scribe Medical Coding Services

**T**hrough a strategic alliance with the industry's leader of outsourced coding labor, Med-Scribe delivers a full range of proven, field-tested coding services to assist with the reduction of backlogs, improve cash flow, streamline coding operations, and reduce non-compliance risk. Our preferred offering includes a long-term partnership; however we also provide interim coding on an as needed basis with volume guarantees.  Our per-record fee encourages accuracy over the need to produce a certain number of charts per hour.

**Our** coders have a four-year bachelor's degree in nursing and several certifications, including AHIMA CCS, CCS-P, or CPC and/or CPC-H and HCS-D. As nursing school graduates, the coders are well-versed in anatomy and physiology, pharmacology and disease process.

Coders are educated and tested throughout the year with various AHIMA assessments, pre-CCS training exams, to ensure they will meet the 95% accuracy requirement for DRG assignment.

Additionally, mandatory quarterly educational sessions devoted to Coding Clinic and CPT Assistant are required of each coder. We keep each coder current of industry trends and regulations with Briefings on Coding Compliance, Decision Health, and MedLearn Publishing Case Studies/Newsletters. The Medicare Learning Network is another of our continuing mandatory educational requirements of **our** coders.
